

Lowering Vehicle Ride Height Not Approved

Vehicle Type: **All**

Model Year: **All**

Concern: **Lowering of vehicle ride height.**

Information: Porsche does not approve the lowering of vehicle ride height. Lowering of our vehicles is a violation of Federal Motor Vehicle Safety Standards and can therefore not, per Federal law, be performed by dealerships or independent workshops. In addition, lowering of the ride height may violate various state or provincial regulations regarding the required height of lights and/or chassis height.

In addition, lowering the vehicle ride height from factory specification can have negative safety implications, examples: damage to fuel pressure lines which could cause a fire with the potential for injury, negatively affect vehicle handling, or even cause structural damage to the suspension and chassis.

Please refer to Workshop Manual Group 44 for vehicle ride height specifications.

Important Notice: Porsche Cars N.A Technical Bulletins are intended for use by professional technicians, not a "Do-it-yourselfer." They are written to inform these technicians of conditions that may occur on some vehicles, or to provide information that could assist in the proper service of a vehicle. Special tools may be required to perform certain operations identified in these bulletins. Use of tools and procedures other than those recommended in these bulletins may be detrimental to the safe operation of your vehicle. Properly trained technicians have the equipment, tools, safety instructions and know-how to do a job properly and safely. If a condition is described, do not assume that the bulletin applies to your vehicle, or that your vehicle will have that condition. See your Porsche Dealer for information on whether your vehicle may benefit from the information. Part numbers listed in these bulletins are for reference only. Always check with your authorized Porsche dealer to verify correct part numbers.
