

**Targa Glass Sliding Cover Lift Mechanism Causes Rattling Noises**

Binder - 6, Body Equipment

Vehicle Type: **911 Targa (996)**

Model Year: **As of 2002**

Concern: **Lift mechanism of glass sliding cover causes rattling noises.**

Information: Rattling noises in the area of the glass sliding cover may be heard on 911 Targa (996) vehicles. This is caused by insufficient preload on the holder units of the lift mechanism. As of October 19, 2004, the holder units and connections of the lift mechanism of the glass sliding cover have therefore been modified.

**Vehicles manufactured before October 19, 2004**, for with a customer complaint "Lift mechanism of glass sliding roof causes rattling noises", **must undergo modification.**

This includes:

- replacing the retaining frame and
- replacing the lift mechanism of the glass sliding cover.

The repair kits, part number, 996.562.933.01 (Retaining frame repair kit) and 996.562.906.00 (Lift mechanism repair kit) must be used for this. It is not permitted to replace individual components (mixed configuration of old/new).

The individual replacement parts of the Targa roof are available in the relevant version for repairs that must be carried out for other reasons as well as for vehicles manufactured up to October 19, 2004 which were modified.

Introduction: October 19, 2004, as of the following VIN:

99 95S 63 5085 USA

**Action Required:** Vehicles with a customer complaint "Lift mechanism of glass sliding roof causes rattling noises", must be modified in accordance with the Workshop Manual.
